

Want Remote Operation?

Landa's LanCom wireless remote operation can control the SEA pressure washer plus detergent from two sources

- Two options are available for remotely controlling pump on/off and injection of detergent from one or two sources
- Controls pump and detergent from up to 300 feet away
- Remote signal can go through building walls
- Saves money and hassle of hard-wired remote stations
- Saves energy with easy shut down of unit when not in use
- Saves time in changing commands while washing on a site away from main unit or on a ladder or scaffolding
